ProcuOS

PROCUREMENT PLATFORM FOR BUSINESSES

Less admin.
More control over every purchase.

Supplier qualification, requests for quotation, reverse auctions, contracts, purchase orders and invoices on a single platform.

procuos.com · support@procuos.com

PROCUREMENT DAY TO DAY

Does any of this sound familiar?

01 · QUOTES

"We request quotes by email and compare them in Excel."

02 · SUPPLIERS

"We lose hours requesting and reviewing supplier documentation."

03 · NEGOTIATION

"Negotiation rounds take us weeks."

04 · HISTORY

"When someone leaves the team, the supplier history goes with them."

05 · INFORMATION

"Procurement information is scattered across people, folders and emails."

06 · REPORTS

"Preparing a savings report for management takes us days."

ProcuOS solves each one with a module. **Start with what takes up most of your time** and expand whenever you want.

THE PLATFORM

One platform for the entire procurement cycle

From internal request to invoice. It’s modular: you switch on only what you need.

Supplier management

- Supplier portal
- Qualification against your criteria, including ESG
- Contact directory and supplier catalogue

E-negotiation

- Requests for quotation in a single format
- Automatic comparison
- Joint purchasing

Reverse auctions

- Real-time bidding
- Awarding with clear rules
- Bid history and ranking

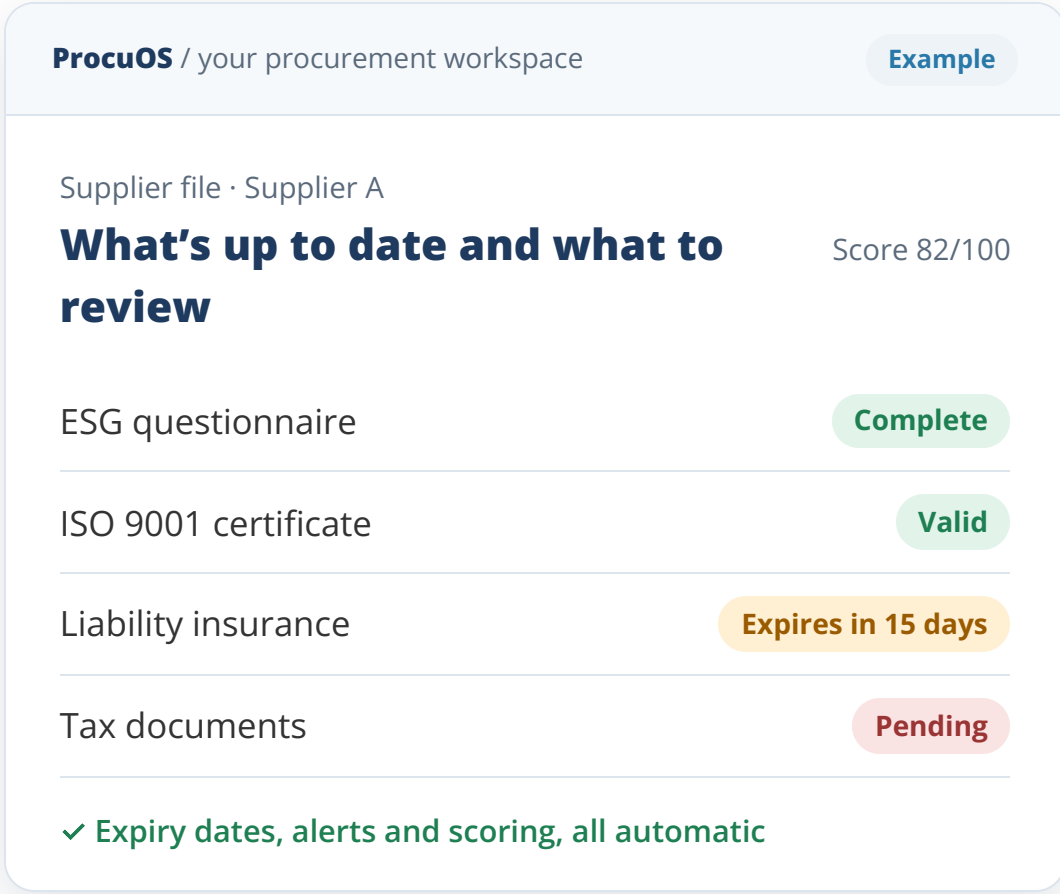

Management tools

- Contracts and expiry dates
- Connected orders and invoices
- Projects, tasks and AI reports

SUPPLIER MANAGEMENT

Qualified, up-to-date suppliers

- No chasing them by email: each supplier keeps its information and documents up to date in its portal, at no cost.
- Qualification with your own questionnaires and requirements, including ESG.
- Automatic expiry alerts and scoring.
- The full history stays on the platform, even when the team changes.

E-NEGOTIATION

Request and compare quotes without Excel

- Suppliers respond in a single format, from their portal.
- The comparison builds itself.
- Requests for quotation and joint purchasing in the same module.

ProcuOS / your procurement workspace — Example

RFQ · Packaging purchase

Three quotes, one format

3/3 received

SUPPLIER	DELIVERY	TOTAL
Supplier A	3 wks	€14,280
Supplier B	**2 wks**	**€13,640**
Supplier C	4 wks	€13,980

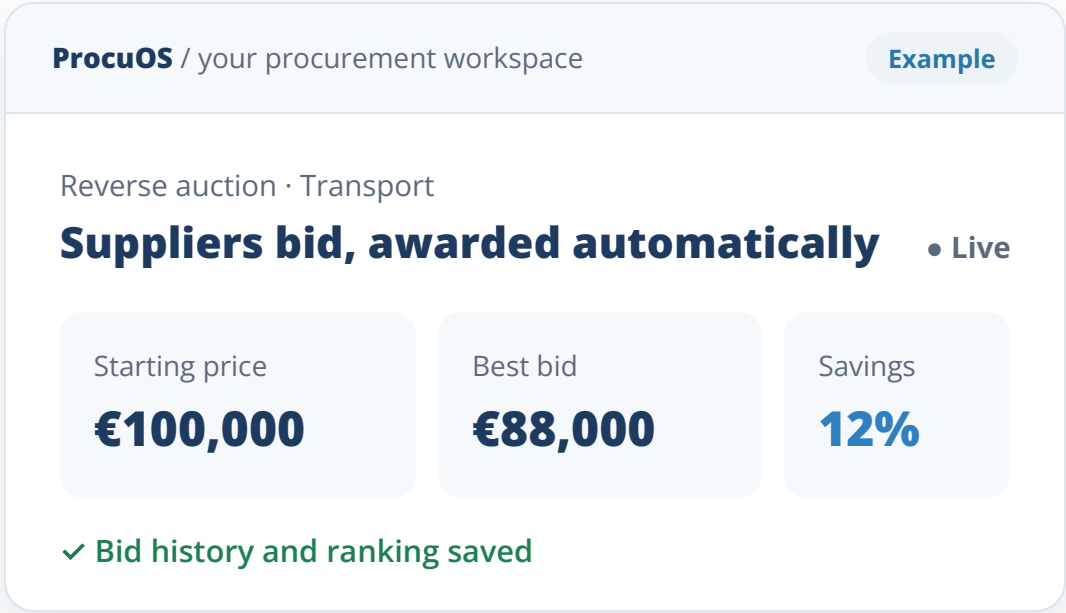

✓ Comparison generated automatically

REVERSE AUCTION

Suppliers bid. Awarded automatically.

- Real-time bidding with no rounds of emails or calls: the auction runs the rounds for you.
- Clear rules: the winning offer is awarded.
- Bid history and ranking saved.

5-20% typical reverse auction savings across the industry

REVERSE AUCTION · WEIGHTING

Different qualities, in the same auction.

- In a normal auction the products have to be equivalent. Not here.
- You choose how much quality weighs and how much price: for example, 40% and 60%.
- Quality is scored with automatic questionnaires and your own assessment.
- Live, each supplier sees its position and the bid it needs to be first.

Every auction can be weighted.
The cheapest doesn't win: the best offer does.

MANAGEMENT TOOLS

After the negotiation, everything in one place

Contracts

A single repository, linked to negotiations and purchases, with expiry and renewal alerts.

Orders and invoices

Invoices linked to their purchase order and contract, tracked and approved in a single environment.

Procurement projects

Processes, contracts, invoices and documents for each initiative, together.

Tasks and team workload

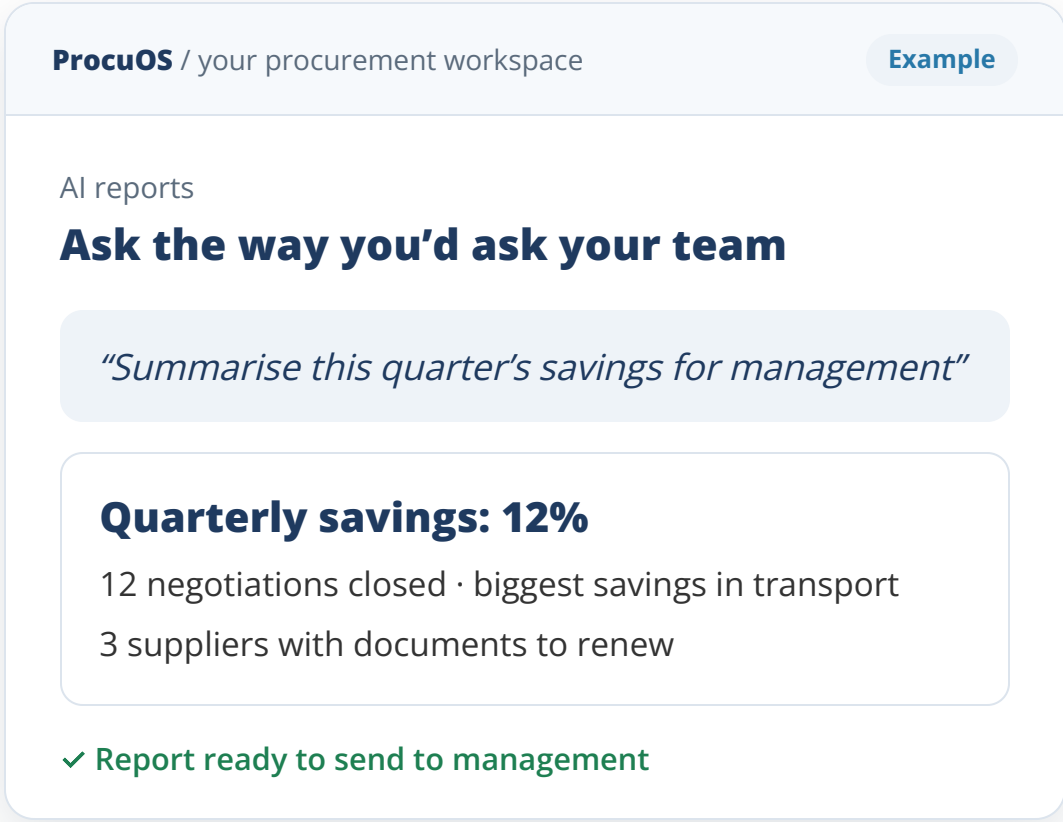

Kanban, list, Gantt and calendar views, plus each person's pending workload.

Using an ERP? ProcuOS integrates via API to sync suppliers and processes.

AI REPORTS AND KPIS

The management report, in minutes

- Ask the way you’d ask your team.
- Supplier, negotiation and savings KPIs, always up to date.
- Real-time activity tracking.

WHY PROCUOS

We’re software, not consultancy

Organised procurement and less admin work. You pay for the modules you use, with no consultancy hours.

5-20%	**+1,500**	**+10 years**	**11 countries**
typical savings per auction	reverse auctions run	building software for procurement teams	with active clients

Where you save time: contract expiry alerts · qualification without chasing anyone · quotes compared automatically · no negotiation rounds · AI-powered reports.

Fixed price before you start **No consultancy hours** **100% self-service**

ONBOARDING

Getting started is easy

1

Choose your modules

Tell us what you want to digitise and we'll prepare a tailored proposal with a fixed price.

2

We guide you through onboarding

We configure the platform with you, bulk-load your data and register your suppliers.

3

Save time and measure results

Your team leaves repetitive tasks behind and tracks savings and activity through its KPIs.

No cost for suppliers | **Web platform: nothing to install** | **ERP integration via API** | **AI-powered reports**

TRY PROCUOS RISK-FREE

Success-based auctions. No savings, no fee.

1

You define it

What you buy, who you invite and your terms.

2

We review it and guide you

We confirm it fits, and within 24-48 h you can launch it.

3

The best offer wins

Clear rules: the winning offer is awarded. If the price doesn’t drop, €0.

No licence and no upfront cost: you pay a percentage of the savings achieved, agreed before you start and never on the purchase amount. We review every purchase before accepting it on a success basis. Afterwards, you can stay success-based or move to a licence by module.
